

INSTRUCTIONS

MODEL : BMW F 650/800 GS

PRODUCT : REAR HUGGER

CODE : RH-BMWF6-8GS

CONTENTS

Plastic Rear Hugger

MATERIAL SPECIFICATIONS

The product's material, made of **ABS** plastic with acrylic exterior layer, can be placed on your bike without requiring painting but if you want it painted, all paint companies have equivalent machinery at their disposal. If you want to paint it yourself, you should contact them to inform you on what you will need and how to do it.

Placement

OUR COMPANY SUGGESTS THE INSTALLATION BE CARRIED OUT AT A WORKSHOP OR BY QUALIFIED STAFF

- Remove the chain guard and the base that holds the rear brake hose (Photo No1 & 2).
- Clean the area around the swingarms.
- Remove the protective film on the hugger.
- Put the hugger in place and under the brake pipe, over the wing (Photo No1 & 2).
- Tighten the wing using the old screws.
- Before you tighten the screws check if the shuttle is in position.
