Placement

OUR COMPANY SUGGESTS THE INSTALLATION BE CARRIED OUT AT A WORKSHOP OR BY QUALIFIED STAFF

- Place the grill upside down and stick the foam tape pieces along its perimeter.
- Route the tire ups as shown in Photo No 1.
- Remove the two screws that hold the radiator.
- Put the grill in position and put the screws at the bottom of the radiator.
- Slide through the tire ups, as shown in Photo No 2, and tighten them very well.
- Cut all the unnecessary tire up left overs and tighten the screws.
- Finally refit the side flaps of the motorcycle.
