Model	Product	Code
YAMAHA Tenere 700/T7	Rear Hugger	RH-YT7

CONTENTS

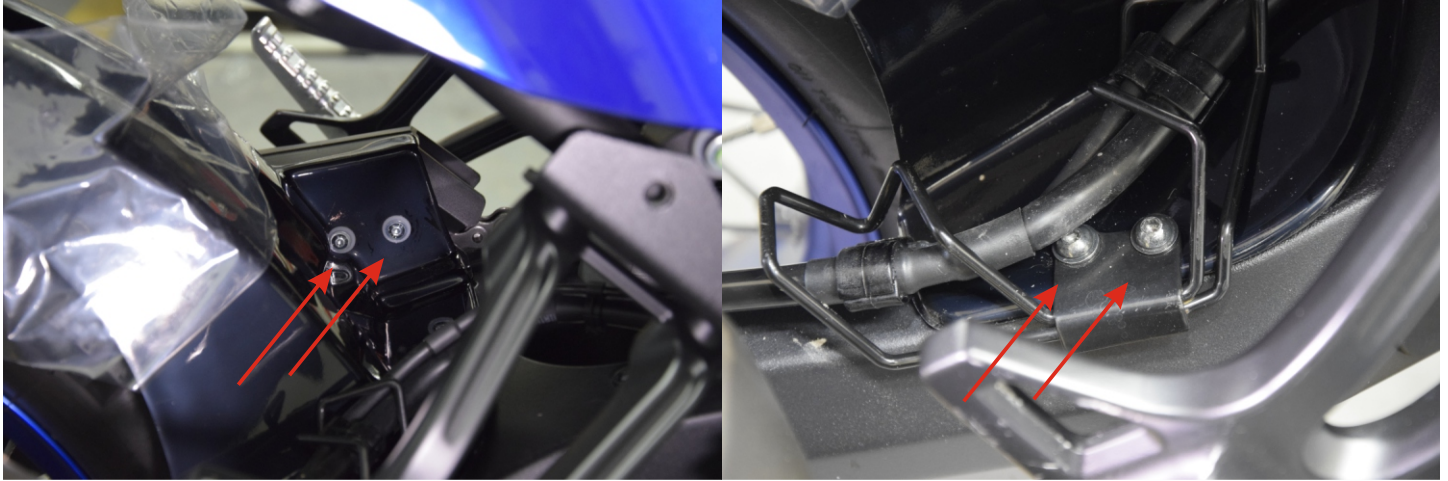

1. 1pcs Rear Fender
2. 2pcs screws M5X15 (allen-oval-washer)
3. 2pcs washers 5X15
4. 1pcs Foam tape sticker 30X5X150 (placed by us)

Remove the protective mudguard on the rear wheel as shown in the photo. You will not use the screws and the mudguard again, so you can save them if you want to restore it at the original form

Then remove the screws that secure the chain guard to the inside only. You will not use these screws again (left photo). Finally remove the base that holds the rear brake hoses. The base and the screws will be used again. (right photo).

Remove the bottom of the protective film and place the hugger.
Tighten the new screws with the washers (figure No2) included in the package, holding the chain protector. Do not tighten yet.
Turn the base on the right side by placing the fender under it. Align the hugger and press the left screws first and then the right ones. Make sure the part is in place and tighten all the screws.
Finally remove the protective film.

This will be the end result. Enjoy your clean rides!

The product is for race use only
