RCB-KTM390ADV-O

RCB-KTM390ADV-W

First remove the rear seat with the key.  
Then remove the 4 screws that secure the back handles.

Turn the cover upside down and install the foam stickers  
on the package as indicated in the photo.

Then stick the big foam on the front, again as  
the photo shows.

Then replace the cover and screw it in, where the rear handles were screwed.

The product is ready for use, you can put your things inside and take your ride.

To close it, lower the lid and screw it on with the special screw that is in the package along with the key. The key is made of plastic, in the beginning it will fasten a little tightly but with use it will be done easier. Always tighten it by hand, do not use any tool. Make sure you always have it with you.

### INSTALLATION OF STICKERS

It is better to be placed by professionals. If you think you have the skills, then follow the Instructions. Clean the surface very well.

Spray with soap and water lightly all over the surface. Remove the protective paper from the sticker and spray this too and place it on the surface. Adjust its position so that it is in the center and check its position back and forth.

Once you make sure it is in the right place then start pushing in the center so that it fits only there. Then with a soft spatula start to dispense the water and bubbles to the outside. You can heat it very lightly and carefully to help trapped bubbles to go outside. When all the water has left the sticker, press very well the edges. Wipe it very well and continue with the other pieces.

The result will be what you see in the photo. Thank you for choosing our company's products!

**The product is for race use only**
